KSL & Great Plains Partnership

Kinol Sharie Leyh & Associates, Inc. is an Authorized Great Plains Dynamics® Dealer. We have a long standing tradition of Information Technology knowledge and excellence. Our IT staff includes nine professionals - three of whom are CPA's, two of whom are Microsoft Certified Systems Engineers and two of whom are networking experts. We have personnel with over fifteen years of experience - who better to answer questions about the changes in IT systems! Finally, as a CPA firm, rest assured we can guide you through your accounting-related questions as well as your IT questions.

Great Plains Dynamics is our newest flagship software system. Dynamics is optimized to run in the Windows NT environment and gives you the choice of three database formats. It is 32-bit compatible, ODBC-compliant and designed to grow along your business. This is not a system you can easily outgrow! Please see our Modules section for more information regarding the modules we offer.

Great Plains Dynamics also provides the ability to start you own e-Commerce operations. Their best system, e.Order, is an out-of-the-box storefront system that integrates with your Sales Order module. It allows positive control on your end by allowing you to control which customers can access it. Imagine if your customers could order their most needed supplies right through the internet, without having to wait on the phone or worry about data entry errors! Plus, this system allows your customers to access their account information. This system is easily customized and does not require web development expertise, as the system does much of the work for you.

For more information please contact our on-site Great Plains Specialist, Mike Wasco at 412-753-1034 or mwasco@kslassociates.com.
